

What is PHIN? Wisconsin PHIN is *all* the IT resources of public health *working together* to implement the Healthiest Wisconsin 2010 plan.

More Information? On the Internet at <http://dhfs.wisconsin.gov/WiPHIN/> or email DHFSWiPHIN@Wisconsin.Gov

WEDSS

- Wisconsin Electronic Disease Surveillance System
- Implementing the Atlas Public Health Information Network Suite
- Currently installed in
 - LA County
 - San Diego County
 - Sacramento County
- Functions
 - Electronic lab reporting
 - Communicable disease reporting
 - Outbreak management, case investigation
 - Environmental investigations
 - Automated notification of cases and alerts
 - User-defined fields and forms
- Pilot through 2006
 - Milwaukee City
 - Brown County
 - Burnett County
- Statewide rollout in 2007
- Migrate TB, other data

AVR

- Analysis, Visualization, Reporting
- SAS Enterprise Business Intelligence Server (EBIS) available on the web later this year
 - Web portal
 - Powerful analytic tools
 - Ease of use
 - Link data sets
 - Remote access (users and data)
 - Piloting with hospital discharge, birth, communicable disease, environmental, and more

- Create good addresses
- Assign geocodes (latitude, longitude)
- New software for Geographic Information Systems (GIS)
 - Display and understand data by location
 - Associate with political boundaries, geographic features
 - See patterns of events by area

PHIN Portal and HAN Redesign

- PHIN User Group established to guide Portal and HAN development
- New PHIN Portal will
 - Provide access to PHIN resources
 - Have improved security
 - Provide general services (e.g. document management)
- A redesigned Health Alert Network (HAN) will
 - Be more user friendly
 - Focus on alerting and communicating.

Workgroups and partners

- DPH Working groups
